

## Mobile wireless ultrasound Scanner

Workable with Tablet or Smart Phone.

Built-in and replaceable battery.

Advanced digital imaging technology,clear image ,

Wireless connectivity, easy to operate

Small and light& easy to carry

### Features

It's a new kind of ultrasound machine is making its way into the pockets of doctors around the world.

The machines used to be confined to clunky computers that had to be carted around. Now, new handheld devices about the size of a Smartphone allow doctors to image patients instantly.

We can diagnose an acute heart attack, fluid around the heart, figure out why someone's valve is not working in five minutes instead of an hour and those minutes can make a big difference.

Ultrasound machines use sound at a frequency above the human range of hearing to create pictures of patients' insides. Meditech iSono, transmit the image directly to iOS hardware , portable screen, making it easier for doctors to make crucial decisions.

You can take this device and get a scan of the patient's ultrasound of the heart immediately right at the bedside

iSono gives us an idea of the severity of their condition and so physicians at that time can make a better judgment call as to whether they need to be admitted.

Feature: Workable with Tablet or Smart Phone      Built-in and replaceable battery  
Advanced digital imaging technology, clear image      High cost-effective  
Wireless connectivity, easy to operate      Small and light , easy to carry  
Applicable in emergency, clinic, outdoor and vet inspection  
Intelligent terminal platform, powerful expansion functions on application, storage, communication, printing

### Specifications

Specifications: Scanning system: array sweep; Frequency: convex array (Multi Frequency) : 3  
.5MHz/5MHz linear array : 7MHz/10MHz Depth: 240mm, Adjustable Screen: Smart phone or tablet screen Supporting  
MacOSx (Android, Windows system coming soon) Display mode: B, B/B, B/M Image gray scale: 256 level Pseudo color: 8  
storage: Using intelligent terminal customers to use (mobile phones, Tablet PC) storage devices Measure: distance, area, obstacle  
wer: by built-in battery Power consumption: 10W (unfreeze) /4W (freeze) Battery working time: 3 hours

Size:104mm\*50mm\*22mm

Weight: 308 gram

Standard Configuration: Main Device (probe) 1 Unit

Internal Battery and charger 1 Set
